

The whole winter POS Factory International has been working very hard and with the rising of the temperatures the productivity is rising even more. We would like to show you some of you recently produced products.

MINI

That we are not afraid of accepting challenges is proved by the product we made for Protest. The boardwear brand came with an original idea, a mini surfboard with funny gimmicks on it like a lamp, laptop and toilet paper holder. It took some time and thinking but eventually the result looks great.

Website Protest: www.protest.eu

MULTI

We have been producing the multi display for a while and that is not without a reason. The word 'multi' is used as the display is very versatile because of the possibilities of the boxes (three, four or five). They can be used attached to each other as a tower, free-standing or hanging. Also, the box offers unlimited possibilities for integration of text and graphics. The display is easy to assemble and parts for assembling are enclosed.

PRICELIST

MAXI

Frequently we supply complete instore communication packages to companies. Also for Ecostyle, supplier of biological fertilizers, crop protection products and all kinds of products for animals, we developed diverse products. For example floor stickers provided with anti slip and banners. At first sight these seem to be simple products but for communication they offer unlimited possibilities. We also designed a product display for ant poison boxes. For this we used our easy display as basis and adjusted it to create the style of the product. Curious for the products of Ecostyle? Check their website: www.ecostyle.nl.
